PROFILE

Digital Experience / EUC professional with **15+ years of IT experience** and **4+ years of hands-on Nexthink Infinity expertise**. Specialized in **endpoint analytics, proactive remediation, DEX score improvement, and EUC optimization** across large enterprise environments. Strong experience in stakeholder reporting, automation, and reducing reactive support through data-driven insights.

WORK EXPERIENCE

ATOS GITSS PVT LTD

Oct 2021 - Present

Digital Experience Engineer / EUC Analyst

- Managed Nexthink Infinity platform for 20K+ endpoints across enterprise Environment.
- Designed and maintained DEX dashboards covering boot time, application crashes, CPU, Memory, and disk performance.
- Improved overall DEX score by ~25-30% through targeted Nexthink campaigns and proactive remediation.
- Reduced P1/P2 EUC incidents by ~30% using Nexthink alerts and behavioral Analytics.
- Created automated Remote Action (PowerShell) to remediate common endpoint issues (cache cleanup, service restart, client repair).
- Performed deep-dive Root Cause Analysis (RCA) and presented findings to IT leadership and stakeholders.
- Partnered with EUC, Infrastructure, and Service Desk team shift from reactive to proactive support.
- Delivered weekly and monthly DEX reports to leadership, enabling data-driven decisions.

KEY ACHIEVEMENTS

- Successfully transitioned EUC support from ticket-driven to experience-driven model
- Identified performance bottlenecks impacting end-user productivity and provided preventive actions
- Acted as Nexthink SME for internal teams and guided junior analytics.

TOOLS & TECHNOLOGIES

- Nexthink Infinity
